Experience

Software Engineer II Apr 2024 – Present
Software Engineer Jul 2022 – Apr 2024
Alarm.com *Tysons, VA*

- Lead the development of a new feature which helped drive x11 greater adoption of specific automations.
- Spearheaded effort to completely remove deprecations owned by my team.
- Created a project from scratch, bringing it from spec level to development based on design documentation.
- Develop parallel lanes of work for projects to minimize blockers.
- Coordinate with PMs, engineers from other teams to develop cross-team projects.
- Advocate for broad adoption of better accessibility practices.

Undergraduate Teaching Assistant Aug 2019 – May 2022
University at Buffalo *Buffalo, NY*

- Assisted in the teaching of Introduction to Computer Science I (CSE115).
- Conducted laboratories for 10-30 students two/three times a week.
- Guided students through recitation workshops in small classroom settings.
- Hosted office hours to assist upwards of 15 students.

Software Engineering Intern May 2021 – Jul 2021
Alarm.com *Virtual / Tysons, VA*

- Developed a web application to display device history graphically.
- Coordinated with software engineers, project management, and UX to facilitate changes.
- Created back-end API unit tests, and front-end acceptance/integration tests.
- Researched, implemented and documented alterations to the build.

Projects

Garden | *JavaScript, HTML, CSS* Ongoing

- Developing a point and click game using vanilla JavaScript
- Utilizing web components to create reusable elements
- Levering data structures to create a system to build/interpret interactions.

March Mascots | *Next.js, React, TypeScript, HTML/CSS* Dec 2023

- Developed a static web application that generates images based on user input.
- Built a componentized system that allows for easy manipulation and data substitution.
- Segmented work into isolated, digestible tickets.
